## THE VERSATILE INJECTION MORTAR FOR ANCHORINGS IN MASONRY AND CRACKED CONCRETE.

The injection mortar FIS V is a 2-component injection mortar based on vinyl ester. It is approved for use in cracked and non-cracked concrete, masonry and for special applications. FIS V is thus the universal injection mortar family with guaranteed reliability for practically all areas of application.

The injection system, comprising the epoxy resin mortar FIS EM Plus combined with a threaded rod, is suitable for pre-positioned and push-through installation. Resin and hardener are stored in two separate chambers and are not mixed and activated until extrusion through the injection capsule in the static mixer. The mortar is injected bubble-free from the drill hole base. It can be processed at low temperatures down to 0°C (outside of the assessment even down to -5°C) as well as seismic applications of performance categories C1, C2.

## AM PREMIUM CONCRETE SCREW

The AM Premium Concrete Screws are simple and time-saving threaded screws for the use in concrete and the RUSPERT® coating provides excellent corrosion protection. Once screwed into the hole the thread taps into concrete for positive fit anchorage. The concrete screw are completely removable anchor suitable for temporary fixings and virtually expansion-free operation allows cost-efficient fixing with small axial spaces and edge distances.

High end, powerful screw solution for fast and simple installation.
